Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5, 8-11, 14, 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Hinrichs et al. (5,269,666). Hinrichs et al. discloses, in figs. 2, 7 and 11, a pressure relief apparatus comprising a rupture disc 24, provide with a high overpressure face, a central section 62 and a peripheral flange section 54, a line of weakness 52 having a opposed end regions 56 in spaced relationship that define a hinge portion 58 between; a hold down member 26 mounted on and engaging the peripheral flange section on the side thereof opposite the overpressure receiving face, and provided with a segment 76 engaging the hinge portion; and the segment having an innermost margin extending between opposed end regions of the line of weakness inwardly spaced relationship form respective outermost ends of the line of weakness.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4, 12, 13, 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hinrichs in view of DeGood et al. (4,512,491).

Hinrichs does not teaches the rupture disc being of generally planar configuration, the line of weakness being defined by a series of elongated, end to end space slits, and a pair of the discs.

DeGood et al. teach, in fig.1, a pressure relief apparatus comprising a rupture disc being of generally planar configuration, a line of weakness being defined by a series of elongated, end to end space slits, and a pair of the discs.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made, to make the pressure relief disc of Hinrichs having the rupture disc being of generally planar configuration, the line of weakness being defined by a series of elongated, end to end space slits, and a pair of the discs, as taught by DeGood et al., in order the central section of disc that ruptures and opens upon application of a force of a predetermined magnitude to the central section.

Allowable Subject Matter

5. Claims 6, 7, 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
